PROFESSIONAL EXPERIENCE

Co-Founder

Flawtrack

06/2024

Kuala Lumpur, Malaysia

As the **technical co-founder**, I built and managed the platform's **entire stack** from initial code to production. I developed the core **Attack Surface Management (ASM)**, **brand protection**, and **threat intel** engines, set up the **DevSecOps pipelines**, and integrated **AI/RAG models** alongside third-party APIs. Beyond the backend logic, I also built the **frontend dashboards**, turning raw security logs into clear, visual data.

Key Milestones & Responsibilities:

- **Client Pentesting & AppSec:** Led continuous enterprise security assessments across web applications, APIs, mobile, cloud, and infrastructure; worked with development teams to test new features, communicate findings, guide remediation, validate fixes, and embed security throughout the SDLC.
- **Threat Intel:** Wrote data pipelines and parsers that processed **2B+ stealer leaks**.
- **ASM Scaling:** Built a **distributed scanning engine** using hundreds of concurrent instances to map large infrastructures (**7,000+ assets**) in **under 3 hours**.
- **Brand Protection:** Created a monitoring system that analyzed **100,000+ network mentions**, leading to **1,000+ successful threat takedowns**.
- **Client Engagement & Security Solutions:** Supported discovery sessions, technical demos, sales meetings, RFPs, and tenders; analyzed client requirements and translated business needs into practical AppSec and cybersecurity solutions.

Security Engineer

DeepStrike

06/2023 – 06/2024

UAE, Dubai

- **Penetration Testing:** Conducted web, API, cloud, and infrastructure pentests, delivering reports and remediation guidance.
- **Application Security:** Worked with developers to reproduce vulnerabilities, validate fixes, and improve security across the SDLC.
- **Cloud & Client Security:** Supported AWS and Cloudflare reviews, security audits, client communication, and technical scoping.

Bug Bounty Hunter

05/2022 – present

I participated in many bug bounty programs, successfully finding and reporting numerous vulnerabilities.

CTF Player

09/2021 – present

Consistently achieved top-percentile rankings in CTF competitions across web exploitation, OSINT, and mobile hacking.

EDUCATION

Student

Faculty of Computer & Information Sciences - Mansoura University

2021 – 2025

Grade: A

CERTIFICATES

- AWS Certified Cloud Practitioner

VOLUNTEERING

CAT Reloaded

Cyber Security Head & Instructor | CAT Reloaded

01/2022 – 08/2023

Mansoura, Egypt

- Instructed students and managed department operations for a prominent university organization.
- Executed penetration tests on team infrastructure and student graduation projects.
- Hosted internal CTF competitions tailored to varying student skill levels.

AWARDS

CTF

- Organizer at IEEE Victoris 1.0 CTF Competition
- Ranked 2nd at CyberTalents July CTF among 210 players
- Ranked 6th at ASCWG 2022 Finals
- Qualified to BlackhatMEA 2022 Finals
- Qualified to @hack CTF 2021 Finals
- Qualified to CyCTF 2022 Finals
